Education

Moravian University, Bethlehem, PA

May 2027

B.S. Computer Science

Related Courses: DevOps, Web Programming, Computer Graphics, Software Engineering

Projects

Helix Jump, Computer Graphics, Moravian University

Fall 2025

- Developed a 3D Three.js arcade game with procedural levels and logic driven movement.
- Implemented dual raycasting for platform detection synced with animation frames.
- Optimized rendering performance using a post processing pipeline and pixelated shaders.
- Utilized Fisher Yates Shuffling to generate randomized, difficulty scaled environments.
- Integrated GLB models, spatial audio, and dynamic lighting systems.

Image Hosting, Web Programming, Moravian University

Fall 2025

- Developed a web app with Flask, SQLite, and JavaScript to upload and manage images.
- Used AWS S3 buckets to store and host user uploaded image files.
- Managed Git branches and pull requests to organize code updates with contributors.
- Developed GitHub Actions to test image uploads, retrieval, and user login sessions.

Anagram Discord Bot Deployment, DevOps, Moravian University

Spring 2025

- Deployed a Discord Bot through a CI/CD Pipeline with Github Actions and Docker
- Developed deployment scripts to ensure stability across different environments
- Manage Git branches, resolved merge conflicts, and pull requests
- Secured Discord API keys using AWS Secrets Manager

Monopoly Board Game, Software Engineering, Moravian University

Spring 2025

- Developed a Monopoly style board game in Java using Swing UI, applying MVC architecture
- Worked in an Agile team environment, participating in daily stand-ups and sprint planning
- Used abstraction to handle different player types and property actions
- Achieved 90% code coverage with tests to ensure game mechanics and features worked correctly

Work Experience

3D Printing Technician and Designer

Sep 2025 – Present

Moravian University, Bethlehem, PA

- Fulfill and track student/faculty print orders
- Maintain and troubleshoot 10+ 3D printers ensuring continuous operation
- Design and prototype custom 3D models using CAD

Security Professional

June 2024 – Sep 2024

Allied Universal, Easton, PA

- Conducted surveillance and incident reporting to ensure safety of clients, employees, and property
- Patrolled guard shack and managed truck access for multiple warehouse sites
- Monitored security cameras and electronic systems to ensure facility safety

Technical Skills

- **Languages:** JavaScript, Java, Python, HTML/CSS
- **Tools & Platforms:** Git, AWS (S3, RDS, EC2), Onshape, Pandas, Flask, Terraform
